## WELCOME INTERNATIONAL HONEY BUYERS

Alberta's honey industry is a natural business, and a growing one. Alberta's commercial honey producers manage 25 billion bees, representing more than 300,000 colonies, to produce more than 40 million pounds of pure honey each year. **In fact, Alberta is the #1 honey producer in Canada.**

The province of Alberta, Canada, is located in western Canada and is renowned for the natural beauty of its varied landscape which includes mountains, glaciers, foothills, lakes, rivers, forests, badlands, wetlands and open prairies.

Alberta's honey bees are nature's super-pollinators, collecting nectar from our abundant crops and native plants to produce honey that's expertly and sustainably harvested by our beekeepers.

Alberta Beekeepers Commission supports 175 producers, works with industry to innovate and grow, and funds research to keep our bees healthy and our industry sustainable.

This **Alberta Honey Export Catalogue** proudly features a selection of export ready Alberta honey producers, producing a range of pure Alberta honey and honey related products in both bulk and retail sized containers. The catalogue is designed specifically for importers, distributors and buyers located throughout Canada and across the globe.

We're proud of our pure, high quality Alberta honey and we're committed to supporting the development of valuable export opportunities and promoting the benefits and purity of Alberta honey.

**Innovative producers, expanding markets,  
and one super food.**

## BUSINESS OVERVIEW

Beary Berry Honey produces flavored honeys, glazes and vinaigrettes from their Alberta apiary. Our Alberta produced honey is blended with real fruit and spices to make a fantastic, healthy spread or sweetener for your hot beverages.

We are certified by the Canadian Food Inspection Agency and currently produce 18 different flavours of honey.

Our facility and products are gluten-free and dairy-free, and we have processes in place to prevent cross-contamination.

Our products are available in 300 gram glass jars and come in cases of 12. Minimum order for export would be one pallet (1,200 jars). Private Labeling is an option based on volume. We also sell raw honey to a packer in drums.

2015 Winner of the Export Awards Alberta.

## BUSINESS OVERVIEW

Bee Maid Honey is a 100 per cent pure Canadian tradition, delivering only the highest quality honey to consumers since 1954. This highly recognizable brand is truly unique because of the two cooperatives behind it – Alberta Honey Producers Co-operative and Manitoba Cooperative Honey Producers. Their products are recognized worldwide for premium quality and exquisite flavour. The honey's delicate flavour is the result of the natural variances of flowering crops and meadows in Western Canada. Bee Maid creamed honey is produced by adding crystallized honey to liquefied

raw honey and mixing it to achieve a smooth, creamed texture. Bee Maid offers a wide variety of shapes and sizes of PETE bottles using their in-house blow moulding facility. Bee Maid's food safety program is always top-of-mind: packing plants are HACCP recognized and they were the first Canadian honey packer to achieve the Safe Quality Food designation. All products are kosher certified. In addition, Bee Maid Honey is True Source Certified®, which means their honey is ethically and transparently sourced. Bee Maid's ownership structure allows them to provide traceability from hive to bottle.

## BUSINESS OVERVIEW

Busy Bee Farm commercially produces honey and provides pollination services. Our honey is naturally sourced from the farms and fields of Alberta's landscape, and is the product of happy and healthy bees that pollinate Alberta crops and native plants.

Having 20 years experience and an active member in the Alberta Beekeepers Commission, Busy Bee Farm is proud to work with surrounding community farmers to bring them the bees that help maximize various crop yields and enhance the general ecosystem.

With compassion and respect for the people and the land in where Busy Bee Farm's hives are placed, important relationships are cultivated across the province. It is with this passion and devotion that Busy Bee Farm produces an honest natural honey product and provides a high quality pollination service.

## BUSINESS OVERVIEW

Golden Acres Honey/McKenzie Country Farm Honey has gained a reputation for producing some of Canada's finest honey. Our natural and healthy products combined with personal, friendly service and integrity ensure customer satisfaction, which is key to our continued success.

Our honey is a product of both the beautiful and natural environment where it's cultivated, and the caring and conscientious Three Hills, Alberta workers. However, at the foundation of our quality honey are the bees that roam the Albertan wildflowers to produce it.

Golden Acres Honey was started in the mid 1980's and continues to be a family-run operation. McKenzie's Country Farm Honey was purchased in 2001.

## BUSINESS OVERVIEW

At the Greidanus Honey Mill we produce our unprocessed honey to be as pure as nature intended. Without blending or pasteurizing our honey, we have maintained all the naturally occurring nutrients to ensure you are receiving nature's healthiest sweetener. We collect all our honey in hives located in the clover-rich prairies of Southern Alberta, known to produce some of the world's finest honey.

We are a CFIA registered and inspected farm. We are True Source Certified, which means all our honey is ethically and transparently sourced.

Our honey is packed in new food grade drums. Our family farm is a second generation farm that has been operating since 1973.

## BUSINESS OVERVIEW

Gilbert Wolfe has always been sweet on bees. As a child, he spent hours observing honeybees in the fields of northern Alberta where he grew up. His first summer job was extracting honey for a local beekeeper. When he was sixteen, Gilbert convinced his father to buy him fifty beehives. Countless stings later, Gilbert extracted his first honey crop in an old granary and a beekeeping business was born.

Over 25 years later, Gilbert and his wife Sharon have grown that initial honey crop into a fully vertically

integrated company with full production, packaging and distribution capabilities. Many things have changed since those early days. The granary has been replaced by a 40,000-square-foot processing facility. Fifty hives have become thousands and 22 full-time employees help to produce and process high volumes of honey every year. What hasn't changed is Gilbert and Sharon's commitment to creating the highest quality honey entirely from the beautiful Peace River region they call home. We are able to offer both conventional and organic honey, in any form (raw, creamed, liquid, unpasteurized) and most sizes (jars, pails, drums, totes).

## PLANNING

Willingness to accommodate and adapt to future market opportunities.

## BUSINESS OVERVIEW

P & J Apiaries Inc. is a family farm that has been farming honey responsibly since 1967. Our mission is to produce the highest quality of honey to be enjoyed by everyone, through the meticulous care of our honey bees.

Our honey can be defined as ‘blossom’ honey denoting sweet, bloomy, fresh, herbal flavors derived from a variety of local nectar sources that are found throughout the Westlock and Thorhild Counties in Alberta.

For bulk sales we only ever use brand new CFIA/FDA approved steel drums as part of company Safe Food

Handling protocol. In addition, every 10 drums produced is sampled in house, for color and moisture and retained for records so that we have a good understanding of our inventory quality throughout the harvest season. With our processing system we also have the ability to offer homogeneous-blended ‘lots’ of honey presenting with consistent color and moisture targets for best quality control of our product. Our hope is that our own sustainable beekeeping practices continue to benefit consumers and the environment while harmoniously supporting a pathway for our future beekeepers and honey bees.

## BUSINESS OVERVIEW

When you purchase Paradis Honey, you are purchasing over 350 years of family beekeeping history from France to Canada. Their forefathers had their beginning in France and sailed to Canada in 1658, landing in Quebec City. Today, Michael, Lise and their children are proud to continue this long family tradition of beekeeping and honey production.

Their family name means Paradis and that is exactly what you receive when purchasing Paradis Honey. The absolute best 100% Pure Raw White Canadian Honey,

sourced from Canadian Clover, alfalfa and wildflowers from the fields of the beautiful Peace River region of Northwestern Alberta, Canada.

With their custom manufactured state of the art equipment, they carefully remove the honey from the hives/combs in their CFIA approved and True Source Certified facility. The honey is placed in new steel drums for storage. Please contact us for all of your domestic and international requirements.

## BUSINESS OVERVIEW

Scandia Honey Company is Canada's largest beekeeping operation, with 15,000 hives. We are located on the sunny prairies of Alberta, where the flowers produce light, smooth, and low-moisture honey. In operation since 1937, Scandia Honey is a family owned and operated company. Our 28 staff are treated as an extension of our family, some with over 20 years experience with us, and we all take pride in the care we provide for both our bees and our world-class honey.

Scandia Honey always produces 100% pure Canadian honey, ready for export in bulk to your country. We have 4 large homogenization tanks in our state-of-the-art facilities, meaning we can ensure product consistency and quality and, if required, take requests for specific honey colour and moisture. We are happy to arrange NMR and other testing. Come see us in the delightful, small town of Scandia, Alberta. We look forward to working with you!

**CURRENT** Japan, Europe (Belgium)

## PLANNING

USA, Europe (Germany, Denmark)

## BUSINESS OVERVIEW

Spirit Hills crafts the highest quality of food pairing wines with local ingredients and a Alberta Rocky Mountain identity. Unlike traditional meads, a good quality food-pairing honey wine has a similar acidity and PH than grape wine. It also has body, complexity, structure and length. The Spirit Hills honey wines offer all that in a well balanced way with a lingering velvety smooth finish. They are served in fine dining restaurants in Canada, Japan and Europe.

The winemakers at Spirit Hills layer the different flavour elements into the wine by choosing local ingredients like rosehips or black currants for acidity, wildflower honey for structure and oak or flowers in the finish. Spirit Hills honey wines are simply: One of a Kind!

## BUSINESS OVERVIEW

SweetHeart Pollinators / Janeil Enterprises Inc.

We custom pollinate with 4000 colonies.

Producer of honey and wax.

We also produce about 2000 queens primarily for our own use.

We are long time members of honey packaging cooperative, BeeMaid, who collectively package over 20 million pounds of honey per year, and export packaged and bulk refined honey worldwide.

## HEALTHY BEES, HEALTHY INDUSTRY

The Alberta Beekeepers Commission, through its Technology Transfer Team (TTT) program, provides disease diagnostics, hive monitoring/sampling services, education and training to beekeepers in Alberta, bridging the gap between science and its practical application.

The scope of the TTT objective includes improving bee health, managing diseases and pests, investigating bee nutrition, developing and answering research questions, and overall, improving beekeeping management and reducing operating costs.

We are committed to provide to the Alberta beekeeping industry the tools they need to improve/maintain colony health. Therefore, the TTT also works directly with beekeepers, provincial apiculturists and researchers, provincial and federal governments, academia and stakeholders to develop and implement

an Integrated Hive Management program for beekeepers in Alberta.

Implementing best management practices using an integrated hive management program has been shown to improve bee health, pollination, honey production, and reduce annual bee losses, use of antibiotics and overall operating costs for beekeepers.

The advantage of a tech transfer team is they, in working directly with beekeepers, can disseminate and transfer knowledge, keeping beekeepers up to date with the latest technologies and options, as well as those beekeeping practices most appropriate for a particular beekeeping operation.
