

# Welcome to the Safe Food for Canadians Licence Tutorial

- This tutorial is intended to familiarize applicants with the key steps in the Safe Food for Canadians licencing process and better understand the activities and food commodities that fit the needs for their business.
- This tutorial generally describes food business activities that can be covered by a SFC licence or licences. There are many combinations of options and thus the examples used in this tutorial may not reflect your particular business situation.
- Industry is responsible for familiarizing themselves with all the requirements of the Safe Food for Canadians Regulations. Licencing is only one of the key requirements.
- A wealth of guidance is available on the CFIA's website including plain-language guidance, interactive tools and timelines and a [Guidance Finder](#).
- Visit [www.inspection.gc.ca/safefood](http://www.inspection.gc.ca/safefood) for more information.

**Start Slide Show to Launch this Tutorial Tool**

then select “English” to start

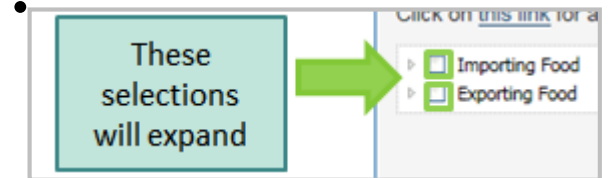

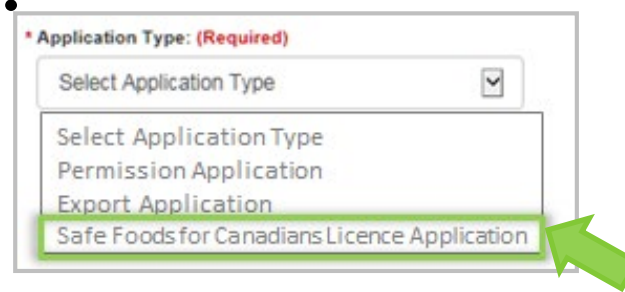

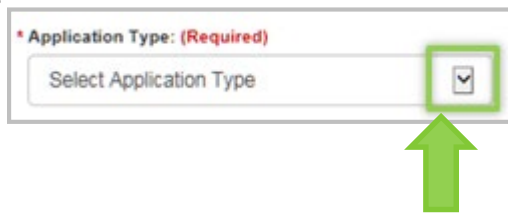

# Getting Started

1. Follow the green boxes to navigate this tool

Start page

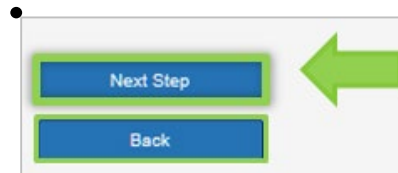

2. Hovering over a green box may show a description of the navigation steps

3. The green arrow may highlight important green box selections in a menu:

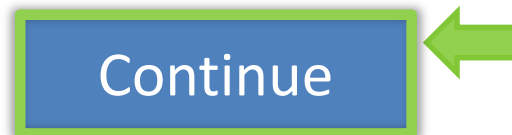

These boxes expand and contract as you click

... or when it's time to proceed to the next step in the application

Follow the green boxes. Clicking anywhere outside of the green boxes will lead to the next slide but may not lead to the next part of the application.

# Getting Started

- Hovering your mouse over the “  “ symbol will reveal more information on the subject/page itself

- You can click on the Red Maple Leaf at the top of the page at any time to return to the navigation page

THE START SCREENS OF  
MAJOR APPLICATION  
SECTIONS WILL APPEAR  
LIKE THIS

Information fields in the application to be  
generated by your selections will appear  
highlighted like this

### Application Create

**i** Important: It is the responsibility of the applicant to ensure that they meet the requirements set out in the Safe Food for Canadians Act and Safe Food for Canadians Regulations. To find out more about the requirements that apply to you refer to [www.inspection.gc.ca/safefood](http://www.inspection.gc.ca/safefood).

\* Application Name (Required)

Next Step

Back

### **Giving your Application a Name:**

You may want to give your licence application a memorable name that reflects the activities you do, or by establishment you operate.

If you choose to separate out your activities and hold one SFC licence for domestic food production and hold another SFC licence for international activities such as importing ingredients, you can give them different names. For example a doughnut producer could name one application as "Doughnut Establishment SFC Licence 2019" and the other application as "Import Ingredients SFC Licence 2019".

If you are adding both those activities to one SFC licence, that's fine too. You will be adding activities later in the application.

## Safe Food for Canadians Licence Application - Licensable Activities

30%

### Licensable Activities

Please select the relevant activities the Food Licence will cover. **(Required)**

#### Licensable domestic activities (Establishment information is required)

- Prepare food for inter-provincial trade
- Slaughter of food animals for inter-provincial trade
- Slaughter of food animals for export
- Storing and handling imported meat for the purpose of inspection
- Preparing food for export
- Preparing food for intra-provincial trade where provincial regulations require a federal licence

#### Licensable international activities

- Importing food
- Exporting food

**To proceed to next step, select Example 1, 2 or 3**

Back

Choose the activities that best suit your business:

Example 1: Select any domestic activity

Example 2: Select **Both** domestic and international activities  
(Click Here to Highlight All)

Example 3: Select any international activity

LEARN ABOUT – Domestic Activities  
**CLICK HERE**

LEARN ABOUT – ALL activities  
**CLICK HERE**

LEARN ABOUT – International Activities  
**CLICK HERE**

- On the right, you can go through some tutorials to learn about the activities, then return to this screen.
- On the left, you can select the examples of activities that fit with your business and proceed with the next sections of the application, where you will be asked to provide more detail about your **specific activities** and your **food commodities**.

The Safe Food for Canadians Regulations specifies whether you need a licence based on **the activities you conduct** and not based on the type of business.

This first section is to better understand the **major types of activities** you want to include on your SFC licence: you can select domestic activities, international activities, or both. You will be asked to provide details about your **specific activities** and your **food commodities** later.

When we talk about activities, it means that the CFIA is interested in which foods you **import** into Canada, **export** out of Canada to a foreign country, or **prepare here in Canada** for export, OR, **prepare here in Canada** for interprovincial trade (across a provincial border).

# Safe Food for Canadians Licence Application - Licensable Activities

30%

## Licensable Activities

Please select the relevant activities the Food Licence will cover. (Required)

### Licensable domestic activities (Establishment information is required)

- Prepare food for inter-provincial trade
- Slaughter of food animals for inter-provincial trade
- Slaughter of food animals for export
- Storing and handling imported meat for the purpose of inspection
- Preparing food for export
- Preparing food for intra-provincial trade where provincial regulations require a federal licence

### Licensable international activities

- Importing food
- Exporting food

### Are you a meat producer or associated with the meat industry?

Licensable domestic activities covers activities typically associated with the meat industry – that is:

- the storing and handling imported meat for the purpose of inspection,
- the slaughter of food animals for inter-provincial trade (within Canada),
- or the slaughter of food animals for export (to another country).

These are all federally regulated activities under the authority of the CFIA.

This activity refers **only** to businesses that will be **presenting imported meat to a CFIA inspector for inspection**. A licence is not required to store meat that has been imported unless it is for the purpose of having it inspected by the CFIA.

- A SFC licence that includes the activity to “**store and handle imported meat for the purpose of inspection**” means that your business is getting imported meat ready for CFIA inspection.
- “**Handling**” the imported meat could cover activities best described as: staging, thawing, unpacking, extracting samples (cutting, sawing, drilling), packaging, trimming, removing parts with defects/contamination, refrigerate/store at room temperature, freeze .... etc.

## Safe Food for Canadians Licence Application - Licensable Activities

30%

### Licensable Activities

**i** Please select the relevant activities the Food Licence will cover. **(Required)**

#### Licensable domestic activities (Establishment information is required)

- Prepare food for inter-provincial trade
- Slaughter of food animals for inter-provincial trade
- Slaughter of food animals for export
- Storing and handling imported meat for the purpose of inspection
- Preparing food for export**
- Preparing food for intra-provincial trade where provincial regulations require a federal licence

#### Licensable international activities

- Importing food
- Exporting food

### Preparing food for export

If your business *prepares* a food here in Canada that is destined to for another country, this is still a **domestic activity** because those activities are based within Canada and you should select **“Preparing food for export”** under **Licensable Domestic Activities**.

If your business is **directly responsible for exporting** the food it prepares for export in a domestic establishment:

- you will want to select **“Preparing food for export”** under **Licensable Domestic Activities** *and*
- also select **“Exporting food”** under **Licensable International Activities**

It’s possible to do only domestic activities, or only international activities, or do both. It all depends on your business.

# Safe Food for Canadians Licence Application - Licensable Activities

30%

## Licensable Activities

Please select the relevant activities the Food Licence will cover. (Required)

### Licensable domestic activities (Establishment information is required)

- Prepare food for inter-provincial trade
- Slaughter of food animals for inter-provincial trade
- Slaughter of food animals for export
- Storing and handling imported meat for the purpose of inspection
- Preparing food for export
- Preparing food for intra-provincial trade where provincial regulations require a federal licence

### Licensable international activities

- Importing food
- Exporting food

### Preparing food for intra-provincial trade where provincial regulations require a federal licence

Covers cases where a provincial requirement states that you require a federal licence, even if the food does not leave the province.

If this doesn't look familiar, it likely would not apply to you. It **does NOT apply to manufactured food commodities** such as baked goods, sweets, snack foods, dried herbs and spices, nuts, etc. (this is not an exhaustive list.)

This **may apply to you** if a provincial requirement says you must apply a federal grade mark to your eggs, or that you need a federal licence to sell fish. You may recognize that this requirement applies to you **IF**:

- you currently hold or previously held a CFIA registration under the *Fish Inspection Act*, *Meat Inspection Act* or *Canadian Agricultural Products Act*, **AND**
- you only sell locally or within your province

## Safe Food for Canadians Licence Application - Licensable Activities

30%

### Licensable Activities

**Please select the relevant activities the Food Licence will cover. (Required)**

#### Licensable domestic activities (Establishment information is required)

- Prepare food for inter-provincial trade
- Slaughter of food animals for inter-provincial trade
- Slaughter of food animals for export
- Storing and handling imported meat for the purpose of inspection
- Preparing food for export
- Preparing food for intra-provincial trade where provincial regulations require a federal licence

#### Licensable international activities

- Importing food
- Exporting food

**Import**  
- bringing food **into** Canada from a foreign country.

**Export**  
- sending food from Canada to a foreign country.

### CUSTOMS BROKER

**Refers to a person who facilitates the clearance of a food shipment through customs**

You can choose to hire someone (such as a customs broker or freight forwarder) to facilitate the **import process** or **export process** by doing the paperwork, handling all transactions related to the food, or managing the shipping, however, it is the SFC licence holder who is responsible for the food and to verify that the food meets Canadian requirements.

The CFIA needs to deal with the SFC licence holder in the event of a recall or food safety complaint.

**Exporters** whose sole activity is to export food as sellers or brokers **may** require a licence if they want to request an export certificate or certificate of free sale from the CFIA.

- Storing and handling imported meat for the purpose of inspection
- Preparing food for export
- Preparing food for intra-provincial trade where provincial regulations require a federal licence

### Licensable international activities

- Importing food
- Exporting food

#### Exporting food:

Exporting food ingredients or a fully finished food product.

This may apply to a business that prepares the food in a domestic establishment AND also directly exports it. It may also apply to **sell**ers and **bro**kers who do not prepare the food themselves but do export it.

#### Preparing food for export

If your business **prepares** a food here in Canada that is destined to for another country, this is still a **domestic activity** because those activities are based within Canada. **You should choose "Prepare for export" under Licensable Domestic Activities.**

If your business is **directly responsible for exporting** the food it **prepares for export** in a domestic establishment:

- You will want to select "prepare for export" under **Licensable Domestic Activities** *and*
- Also select "exporting food" under **Licensable International Activities**

**Exporters** whose sole activity is to export food as sellers or brokers **may** require a licence if they want to request an export certificate or certificate of free sale from the CFIA.

## Understanding the Term: Prepare

In this licence application, “Preparing” means:

- Manufacturing
- Processing
- Treating
- Preserving
- Grading
- Packaging
- Labelling
- Storing

## It could include activities commonly described as:

- |             |                |            |
|-------------|----------------|------------|
| basting     | deboning       | cleaning   |
| blanching   | distilling     | crushing   |
| canning     | drying         | extraction |
| coating     | cooking        | filleting  |
| irradiating | fermenting     | filtering  |
| marinating  | freezing       | mincing    |
| pickling    | reconstituting | pressing   |
| rendering   | smoking        | sweetening |
| sweetening  | slicing        | stuffing   |
| trimming    | shucking       | rinsing    |
| washing     | whipping       | waxing     |

**Note for Retailers:** You do not need a licence to manufacture, process, treat, preserve, grade, package, store and label food at retail if you sell the food to consumers within your province. If you are unsure, check the CFIA’s Interactive Licensing Tools and Timelines.

## Understanding the Term: Store

**Store** (verb) – Keep food for future use, or keep food for the purpose of maintaining the quality and condition of the food.

Some examples of storing: keeping a food at certain ambient temperature; keeping a food refrigerated; keeping a food frozen; employing humidity controls in a way to maintain a food's quality (preventing rot).

You are not required to add “store” as an activity, *HOWEVER* there are some situations where you might want to:

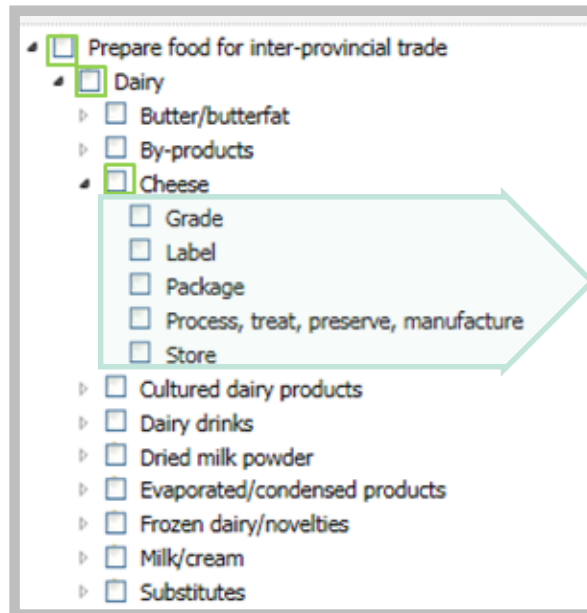

- (i) If **your main activity is storing food that is subject to the SFCR**. For example, you may want to have a SFC licence to meet requirements of your buyers or sellers, whether your buyers or sellers are located within Canada or another country.
- (ii) If you are an **exporter** – remember that **some trading partners expect** that the facility storing food for export is associated with a SFC licence.
- (iii) If you do business with a **wholesaler** or **distribution centre** who **wants you to have a SFC licence** so that they can source their food from a SFC licence holder. For example, if your food products go to a distribution centre or wholesaler who will sell the food inter-provincially and must source the food from a licence holder.

**Licensable domestic activities** covers a number of different food production activities carried out in a **domestic establishment**.

Later in the application, you'll be asked to specify your **food commodities**:

- Dairy
- Egg
- Fish and Seafood
- Fresh Fruits & Vegetables
- Honey
- Manufactured Foods
- Maple
- Meat and poultry products
- Processed Fruits and Vegetables

Then, you'll be asked to specify **activities** you perform with those **food commodities** in your domestic establishment(s):

- Grading
- Labelling
- Packaging
- Processing, treating, preserving or manufacturing
- Storing

## Safe Food for Canadians Licence Application - Licensable Activities

30%

### Licensable Activities

**i** Please select the relevant activities the Food Licence will cover. **(Required)**

#### Licensable domestic activities (Establishment information is required)

- Prepare food for inter-provincial trade
- Slaughter of food animals for inter-provincial trade
- Slaughter of food animals for export
- Storing and handling imported meat for the purpose of inspection
- Preparing food for export
- Preparing food for intra-provincial trade where provincial regulations require a federal licence

#### Licensable international activities

- Importing food
- Exporting food

Next Step

Back

- **Licensable domestic activities** covers a number of different food production activities carried out in a **domestic establishment** where the food is prepared for inter-provincial trade or prepared for export, or where the slaughter of food animals for inter-provincial trade or export takes place.
- Are you a meat producer or associated with the meat industry? **Licensable domestic activities** covers activities typically associated with the meat industry – that is, the storing and handling imported meat for the purpose of inspection, the slaughter of food animals for inter-provincial trade (within Canada), or the slaughter of food animals for export (to another country). These are all federally regulated activities under the authority of the CFIA.
- The **storing and handling of meat for the purposes of inspection** refers **only** to businesses that will be **presenting imported meat to a CFIA inspector for inspection**. A licence is not required to store meat that has been imported unless it is for the purpose of having it inspected by the CFIA.

#### Preparing food for export

- If your business **prepares** a food here in Canada that is destined to for another country, this is still a **domestic activity** because those activities are based within Canada. **You should choose “Prepare for export” under Licensable Domestic Activities**. If your business is **directly responsible for exporting the food** it prepares for export, you will want to select “exporting food” in the under **Licensable international Activities** AND “prepare for export” under **Licensable Domestic Activities**. It’s possible to do only domestic activities, or only international activities, or do both. It all depends on your business.

#### Preparing food for intra-provincial trade where provincial regulations require a federal licence

- Covers cases where a provincial requirement states that you require a federal licence, even if the food does not leave the province. If this doesn’t look familiar, it likely would not apply to you. **It does NOT apply to manufactured food commodities** such as baked goods, sweets, snack foods, dried herbs and spices, nuts, etc. (this is not an exhaustive list.)
- This **may apply to you** if a provincial requirement says you must apply a federal grade mark to your eggs, or that you need a federal licence to sell fish. You may recognize that this requirement applies to you IF:
  - You currently hold or previously held a CFIA registration under the *Fish Inspection Act*, *Meat Inspection Act* or *Canadian Agricultural Products Act*, **AND**
  - you only sell locally or within your province

Next step

Back

Select commodities before going to the next step

### CAUTION

Please select the category that reflects your food product(s).

For example – if you import doughnuts, that is a manufactured food.

If you import eggs to use as an ingredient in a doughnut you produce in Canada, then you import eggs.

The SFC licence application will ask you to specify which food commodities your business imports, exports or prepares in a domestic establishment.

This food commodity list **will show up again** for any other SFC licensable activity you've selected.

[More Information Click Here!](#)

## More Information...

It is important to select the commodity that best reflects your food products. For example, if you make cream filled doughnuts they would fall into the category of "manufactured foods." You do not need to select categories to cover the ingredients you use in your products (you would not select "eggs" or "dairy" to cover the ingredients in your doughnuts).

Selecting the wrong commodity could unnecessarily trigger a pre-licence inspection and slow down your licence application. For more information, refer to examples listed in

[Food categories identified in the licence application.](#)

Storing

**You are not required to add "Store" as an activity, HOWEVER there are some situations where you might want to:**

**(i) Your main activity is storing food that is subject to the SFCR.** For example, you may want to have a SFC licence to meet requirements of your buyers or sellers, whether your buyers or sellers are located within Canada or another country.

**(ii) If you are an exporter – remember that some trading partners expect that the facility storing food for export is associated with a SFC licence.**

**(iii) You do business with a wholesaler or distribution centre who wants you to have a SFC licence so that they can source their food from a SFC licence holder.** For example, if your food products go to a distribution centre or wholesaler who will sell the food inter-provincially and must source the food from a licence holder.

#### REMINDER

##### Preparing food for intra-provincial trade where provincial regulations require a federal licence

Covers cases where a provincial requirement states that you require a federal licence, even if the food does not leave the province.

If this doesn't look familiar, it likely would not apply to you, **as it does NOT apply to manufactured food commodities** such as baked goods, sweets, snack foods, dried herbs and spices, nuts, etc. (this is not an exhaustive list.)

This **may apply to you** if a provincial requirement says you must apply a federal grade mark to your eggs, or that you need a federal licence to sell fish. You may recognize that this requirement applies to you **IF:**

- you currently hold or previously held a CFIA registration under the *Fish Inspection Act*, *Meat Inspection Act* or *Canadian Agricultural Products Act*, **AND**
- you only sell locally or within your province

### Establishment Activity

This screen will allow you to select the associated commodities and sub-activities based on the activities you have selected in the previous screens.

**Please note:** Selecting the white arrows on the left of the commodities will display more options such as sub-commodities and sub-activities.

In order to make sure that your licence contains the right commodities and activities, please make sure to read the below:

Click on [this link](#) for a list of examples of what type of food may fall under each food commodity.

Click on [this link](#) for a list of examples of activities.

#### EST1

- Prepare food for inter-provincial trade
- Preparing food for intra-provincial trade where provincial regulations require a federal licence
- Preparing food for export
  - Dairy
  - Egg
  - Fish and seafood
  - Fresh Fruits and Vegetable
  - Honey and Honey Products
  - Manufactured Foods
  - Maple and Maple Products
  - Meat and poultry products
  - Processed Fruits and Vegetables
- Slaughter of food animals for inter-provincial trade
- Slaughter of food animals for export
- Storing and handling imported meat for the purpose of inspection

**Preparing food for export is a domestic activity because it is conducted in a domestic establishment**

**REMINDER:**

Your business might only prepare the food for export but not directly export **OR** your business might do both!

You'll be asked to specify which commodities and activities you perform at your establishment to **prepare your food for export**

- A SFC licence that includes the activity to **“store and handle imported meat for the purpose of inspection”** means that your business is getting imported meat ready for CFIA inspection.
- **“Handling”** the imported meat could cover activities best described as: staging, thawing, unpacking, extracting samples (cutting, sawing, drilling), packaging, trimming, removing parts with defects/contamination, refrigerate/store at room temperature, freeze .... etc.

# Safe Food for Canadians Licence Application - Establishment Activity

60%

## Establishment Activities

The following selected activities require establishment information.

- \* Prepare food for inter-provincial trade (required)
- \* Preparing food for export (required)

In the grid below, identify the relevant activities specific to each establishment.

Showing 1 to 1 of 1 entries | Show 10 entries

Establishment	Commodity/Activity
UAT Establishment 1 Select Domestic Activities	Prepare food for inter-provincial trade <ul style="list-style-type: none"> <li>Manufactured Foods / Grain derived foods / Process, treat, preserve, manufacture / Package / Label</li> </ul> Preparing food for export <ul style="list-style-type: none"> <li>Manufactured Foods / Grain derived foods / Process, treat, preserve or manufacture / Package / Label</li> <li>Manufactured Foods / Confectionary / Package / Label</li> </ul>

The combination of **food commodities** and **specific activities** occurring at the **Selected Domestic Establishment** appears under the headings of your **Domestic Licensable Activities**

- In this example, a Canadian doughnut establishment prepares doughnuts to sell in multiple provinces across Canada.
- Doughnuts are a manufactured foods, grain derived food commodity.
- They also prepare the doughnuts for export.
- In addition, they buy bulk candy from a supplier, then package and label it at their establishment, for export.

# Safe Food for Canadians Licence Application - Preventive Control Plan (PCP) Declaration

## Preventive Control Plan (PCP) Declaration

### Written Preventive Control Plan (PCP) Declaration

The following activities and commodities selected for this food licence require a written PCP declaration. Please review the Preventive Control Plan (PCP) guidance.

Activity	Commodity
Importing Food	Dairy
Prepare food for inter-provincial trade	Egg

#### Written PCP Declaration (Required)

\*AT Kenny Inc. meets Part 4 of the Safe Food for Canadians Regulations, and prepares, keeps and maintains a Preventive Control Plan (PCP), for the activities and commodities listed above.  
The PCP outlines the hazards that present a risk of contamination to the food, the control measures applied to prevent, reduce to an acceptable level or eliminate these hazards, the measures that ensure the food complies with consumer protection requirements and that animal welfare requirements are respected, as applicable.

The following activities and commodities selected for this food licence do not require a written PCP declaration, however if a written PCP has been completed it can be declared. Please review the Preventive Control Plan (PCP) guidance.

#### Written PCP Declaration (Required)

\*AT Kenny Inc. meets Part 4 of the Safe Food for Canadians Regulations, and prepares, keeps and maintains a Preventive Control Plan (PCP), for the activities and commodities listed above.  
The PCP outlines the hazards that present a risk of contamination to the food, the control measures applied to prevent, reduce to an acceptable level or eliminate these hazards, the measures that ensure the food complies with consumer protection requirements and that animal welfare requirements are respected, as applicable.

\*AT Kenny Inc. meets Part 4 of the Safe Food for Canadians Regulations and does not have to prepare a Preventive Control Plan (PCP) under subsection 36(2), for the activities and commodities listed above.
