

Bees & Beers

Join us for an informal and fun social session as we *cap off* the IPM workshop with **Bees & Beers**

We're pleased to welcome Hans Doef of **Blindman Brewing** to share how they recently collaborated with two local beekeepers to create their first ever honey lager, and how their commitment to pure, locally sourced ingredients inspires them to create innovative, quality, flavorful craft beer.

We hope you will take a moment to grab yourself a refreshing drink (**perhaps a Blindman Beer...?**), relax, enjoy some of the locally made **beer nuts** we included, made with pure Alberta honey by Going Nuts Calgary, while you listen to the Blindman story. Then enjoy some time connecting with friends and other beekeepers through the networking platform wonder.me.

Enjoy a special *beekeeper* discount when you visit Blindman Brewing in Lacombe and mention that you participated in the 2021 ABC IPM Workshop!
