--	---	---

Objective: An evaluation by the foreign country to ensure compliance of the imported product.

Responsibility: Management

Frequency: When exporting product to a foreign country with additional export conditions

Procedure:

1. If the foreign country has additional export conditions that exceed or differ from the SFCR:
 - a. Documentation will be provided describing the honey import requirements of the foreign country. This could include:
 - i. the webpage or link to the foreign country's website where the honey import requirements are shown;
 - ii. documentation with the importing country's inspection body who provided the requirements;
 - iii. documentation with the importer of the foreign country; and/or,
 - iv. copy of the export certificates needed (which has the requirements identified on it)
 - b. written controls will be prepared and implemented that demonstrate compliance with the additional conditions.
2. It is the responsibility of the producer to work closely with the importer to ensure that exports comply with Canadian requirements and those of the importing country.
3. Written controls that are prepared and implemented to demonstrate compliance with additional export conditions will be included in the producer's Export Control Plan and formatted in the following manner:
 - 2.1 Importing Country Conditions
 - 2.2 Controls in place to ensure compliance with importing country conditions including:
 - 2.2.1 Product Controls
 - 2.2.2 Establishment Controls
