

Safe Honey Production Practices
2019

Export Control Plan

Honey Producer-Grader

Prepared by Beary Berry Honey Inc.

DISCLAIMER:

Beary Berry Honey Inc., to the best of its abilities, has written the Safe Honey Production Practices 2019 (SHPP 2019) Export Control Plan to be in compliance with the Canadian Food Inspection Agency's (CFIA) Safe Food for Canadians Regulations/Act (SFCR/A). It does not guarantee that it has identified all potential risks and all control measures that may be required as risk management is ultimately the responsibility of the producer. To the full extent of the law, Beary Berry Honey Inc. excludes liability for any loss arising through the provision of services by itself or its employees (including liability for negligence).

This program is intended to provide standard operating procedures and records for implementation by honey producers and graders when exporting raw honey and honey related products. Because food safety standards are constantly evolving and may vary, it is the responsibility of the producer to remain current.

While Beary Berry Honey Inc. has written the SHPP 2019 Export Control Plan to be in compliance with the CFIA SFCR/A, it does not guarantee a successful audit by the CFIA. It is the producer's responsibility to implement the SHPP 2019 Export Control Plan and ensure that all documents have been made site-specific to their operation.
